- Bush regeneration techniques
- Scientific research on the Jane Brook
- Herbicide use and safety
- Skilled Chainsaw Operation
- Assist with committee roles

Formed in 1998, the Jane Brook Catchment Group Inc grew out of community concern for the degraded state of the Jane Brook and the effect of land use impacts within the catchment.

The catchment group develops and implements action plans to address environmental issues, conducts on-ground projects and works closely with government agencies to protect and enhance the natural values of the Jane Brook Catchment.

Meetings are generally held on the 4th Thursday of every second month at 6:45pm at Mundaring Shar-ing, 3 Craigie Place Mundaring. Please confirm dates and times with one of the JBCG Inc. contacts in case of changes.
